

2 PACK EPOXY LINE MARKING

Our 2 Pack Epoxy Line Marking system is a premium, professional-grade coating designed for long-lasting performance in industrial, commercial, and high-traffic environments. Applied as a liquid coating, it forms a tough, seamless bond with the substrate that won't peel like tapes or pre-formed markings. The result is a highly durable, gloss-finish line marking solution that delivers excellent visibility, resistance to wear, and a clean professional appearance. Available in standard, fast-cure, and anti-slip variants, the system can be tailored to suit site-specific requirements and operating conditions.

PRODUCT FEATURES:

- **Exceptional Durability:** Designed to withstand heavy vehicle and pedestrian traffic.
- **Permanent Bond:** Liquid-applied system penetrates and bonds to the surface. Will not lift or peel like tape-based marking systems.
- **Professional Gloss Finish:** Provides a clean, high-visibility appearance. Easy to maintain and keeps markings looking sharp.
- **Customisable Performance:** Available in fast-cure formulations to reduce downtime. Anti-slip additives can be incorporated, ideal for wet areas.
- **Non-Marking Surface:** Durable finish resists scuffing and marking under normal use.
- **3-Year Adhesion Warranty:** Backed by a comprehensive adhesion warranty when applied to correctly prepared surfaces.

LIMITATIONS & NOTES:

- **Extended Cure Times:** Standard formulations require longer curing periods before full service, site downtime may need to be planned accordingly.
- **Professional Installation Required:** Installed by trained professionals to ensure quality and warranty compliance.
- **Hazardous During Application:** Not ideal for environments with food.
- **Difficult to Remove:** Designed as a permanent marking solution. Removal typically requires mechanical grinding or surface preparation methods.
